Module 5: Assignment 1 – Independent & Dependent Features

Problem Statement:

You work in XYZ Corporation as a Machine Learning Engineer. The corporation wants you to recognize the set of independent and dependent features from the sets of datasets.

Tasks to be performed:

1. Load the city_temperature dataset .
    a. Find out the independent and dependent features from the data frame for model training.
2. Load the Placement_Data_Full_Class dataset.
    a. Find out the independent and dependent features from the data frame for model training.
3. Load the Pharmacovigilance_audit_Data dataset.
    a. Find out the independent and dependent features from the data frame for the model training.
