

Module 1: Assignment 3 – C Function

Problem Statement:

You work in an organization who builds software for pharmaceutical company. The pharmaceutical company provides its data to your company to analyze and extract some useful insights. For this, you may require to check each and every column in small sets. For this, the company assigns you the following tasks:

Tasks to be performed:

1. Extract the following columns from the dataset:
 - a. Age and Issues.
 - b. Patient ID and Drug ID.
 - c. Gender, Age, and Issues.
 2. Extract the following rows:
 - a. Row numbers 1,2,3,4, and 5
 - b. Rows from 15 to 75
 - c. Rows from 100-150
 3. Extract the following rows and columns:
 - a. Columns (1,2,4) and rows(1 to 10)
 - b. Columns (2,4,5) and rows(50 to 120)
 - c. Columns (1,3,6) and rows(100 to 200)
-
